License table for Competency partners

Refer to the Product Usage Guide for important details regarding license use rights and limitations about each software product or online service. Your organization must comply with the use terms outlined in the Product Usage Guide.

Core licenses

When you earn your first silver or gold competency, you earn a set of core benefits and additional benefits specific to the competency you earned. Core benefits include the latest internal-use software and online services that you can use to run your business, sell your solutions, develop applications, and train employees; however, these licenses must not be resold or used for direct revenue-generating activities, commercial purposes, personal purposes, or customer training.

Core Benefits now give partners the power of choice to mix-and-match online services and on-premise software licenses. Partners can choose between work-alike solutions for productivity, demonstration, development, testing, and internal training purposes.
